## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) The invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Ward (6,186,595). Ward discloses the use of a seat assembly for a motor vehicle seat, comprising a seat frame (10) which defines a seat surface (22) for a motor vehicle occupant; and a pivotally mounted backrest (30) which is foldable about a pivot axis (58) onto the seat surface, wherein the pivot axis is moveable along a predetermined path when the backrest is folded forward onto the seat surface. In regards to claim 2, wherein the pivot axis is formed by a physical subassembly (16) of the seat assembly. In regards to claim 3, the pivot axis is formed by a bearing spindle (40), in which the backrest is mounted on a frame subassembly. In regards to claim 4, the pivot axis is positively guided along the predetermined path when the backrest is folded forward. In regards to claim 5, the pivot axis is guided by a guide device (46) that extends along a predetermined path. In regards to claim 6, the guide device is formed by a guide slot, see figures 1-1a.

***Allowable Subject Matter***

3. Claims 7-49 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

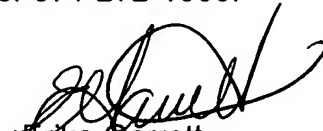

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to further show the state of the art with respect to seat assembly: U.S Pat. No. 4726622, 6513875, 5015026, 6752461 and 4969682.
